

AquaPonics

*An Eco-Friendly,
Sustainable Solution
for your home*

How Aquaponics works

Aquaponics is the cultivation of fish & plants together in a constructed, recirculating ecosystem utilizing natural bacterial cycles to convert fish waste to plant nutrients. This is an environmentally friendly, natural food growing method that harnesses the best attributes of aquaculture and hydroponics.

Benefits of Aquaponics

- Organic fruit & vegetables in your own back yard
- No chemicals or fertilizers needed
- Low energy consumption
- Water conservation
- Uses less space to yield more vegetation
- Fast healthy growing, nutrient filled vegetables
- Protein source (if edible fish are used)
- Systems built to suit budget, shape and size
- Can easily be integrated with an existing fish tank or koi pond
- Fun for the whole family
